Title

Social Blogging Website

Introduction

This is a Social Blogging website, used for Developers, Companies and Clients. It is design and develop by a mern Stack developer. It is Single page Website which is more efficient and easy for clients to use.

Languages

- HTML
- CSS
- Bootstrap
- JavaScript
- React
- Mongo DB (Database)
- Node Js
- Express Js

User

This Website design for Fallows:

- Developers
- Company
- Client

Developers

Developers are the most of the user of this websites. They can write there about their self and show there works on it. Company and Clients can easily hire them for their work. They can tell about their skills in which they are experts and according to that they can hire on their expertise.

Companies

Companies are the one who seeks best developers and they can hire the developers for themselves from this websites on the expertise they need and their experience.

Clients

Clients also hire their developers for single projects so that non-professional man can easily connect with software developers easily.

Video provides a powerful way to help you prove your point. When you click Online Video, you can paste in the embed code for the video you want to add. You can also type a keyword to search online for the video that best fits your document.

To make your document look professionally produced, Word provides header, footer, cover page, and text box designs that complement each other. For example, you can add a matching cover page, header, and sidebar. Click Insert and then choose the elements you want from the different galleries.

Themes and styles also help keep your document coordinated. When you click Design and choose a new Theme, the pictures, charts, and SmartArt graphics change to match your new theme. When you apply styles, your headings change to match the new theme.

Save time in Word with new buttons that show up where you need them. To change the way a picture fits in your document, click it and a button for layout options appears next to it. When you work on a table, click where you want to add a row or a column, and then click the plus sign.

Reading is easier, too, in the new Reading view. You can collapse parts of the document and focus on the text you want. If you need to stop reading before you reach the end, Word remembers where you left off - even on another device.
